

CAPH INSTALLER GUIDE  
v2.8.4 - Nov 2017  
J. Sérot (jocelyn.serot@uca.fr)

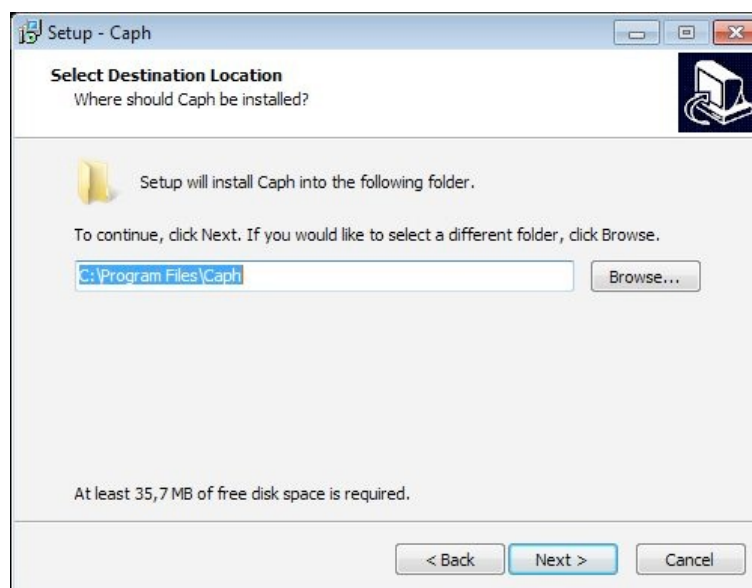

STEP 1 - Click on the self-installer icon

STEP 2 - Read and accept licence agreement

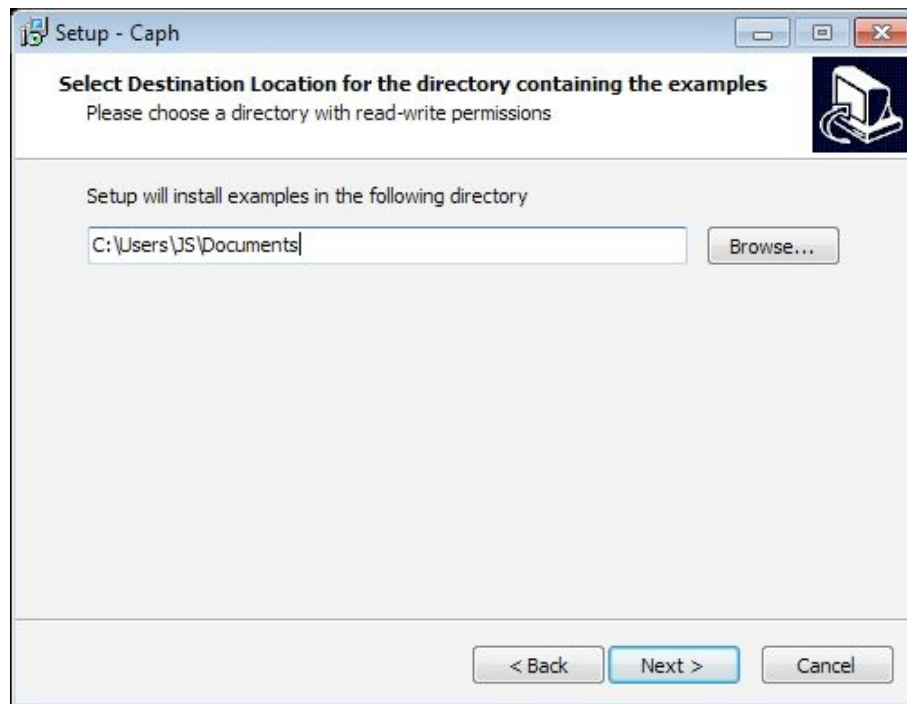

STEP 3 - Select installation directory

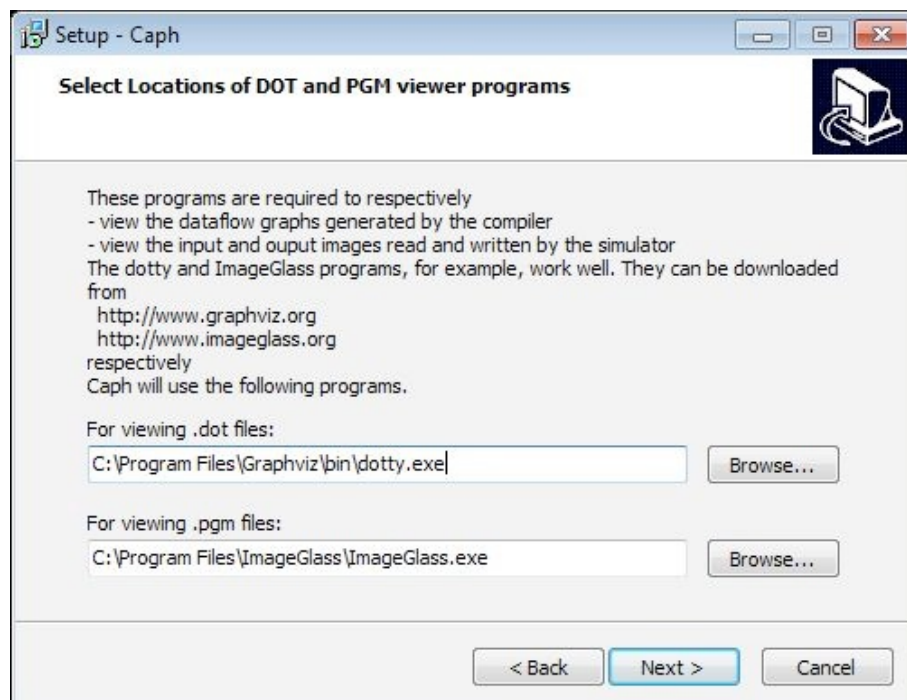

#### STEP 4 - Select directory for installing examples

Note : it is not recommended to install the examples in the same directory as the program. Be careful to choose a location where you have read and write permissions

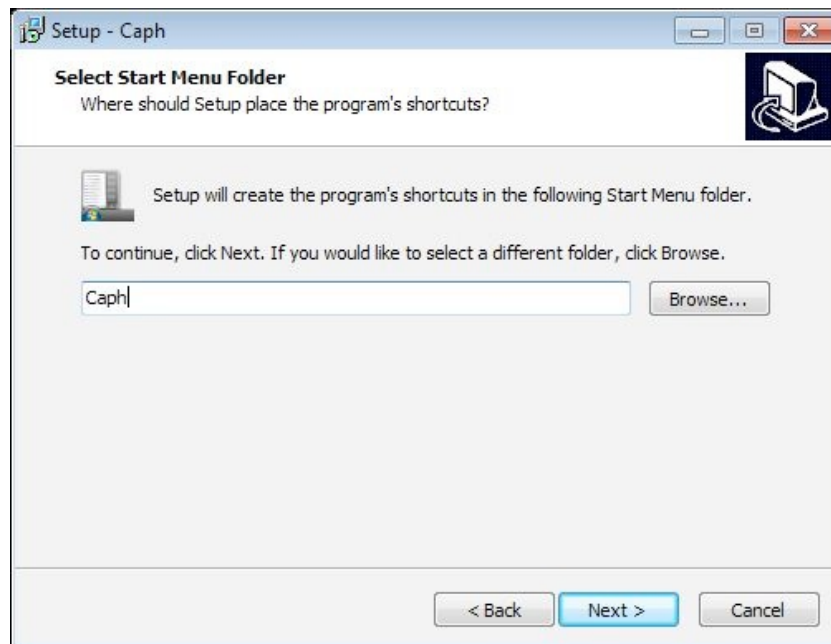

#### STEP 5 - Specify programs to use for viewing graphs and images

Note : these programs must be present on your computer. If not, you can proceed but Caph won't be able to display the generated dataflow graphs and display input/output images. Links for downloading such programs are indicated in the wizard window.

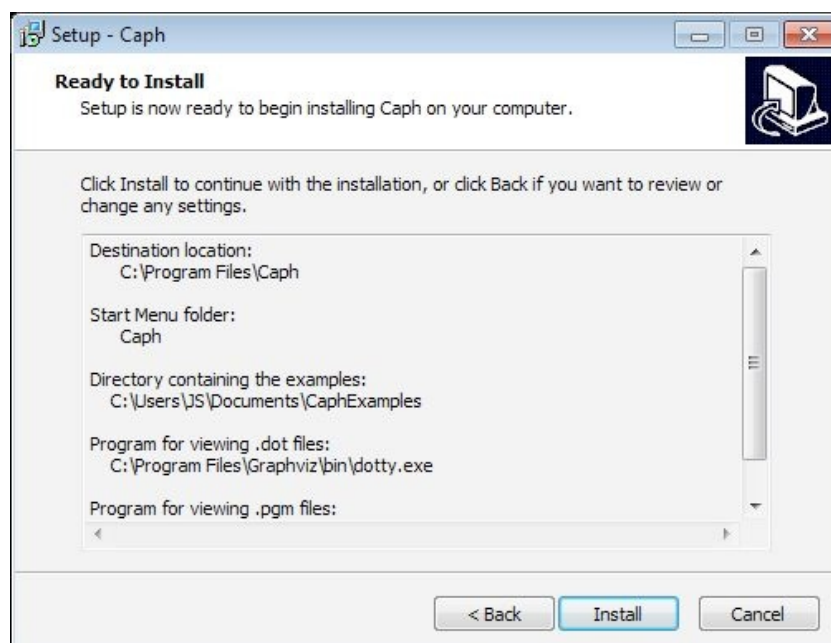

## STEP 6 - Specify shortcut to use for launching Caph application

## STEP 7 - Ready to install

Check all items and click Install button. This will

- create an install directory at the specified location (here : C:\Program Files\Caph)
- create and copy the examples at the other specified location (here : C:\Users\JS\Documents\CaphExamples)
- create an .ini file for the application remembering these settings

At the end of the install, you'll have to possibility to view the QuickStart guide and/or starting the application
